SDC Hackathon 2026 - Replit Proof of Use

Team 16.0 | Project: ShiftHappens

Live app: https://sdc-hackathon-2026-team-160.replit.app

Repository: https://github.com/jenwennnn/SDC_Hackathon_2026_Team16.0

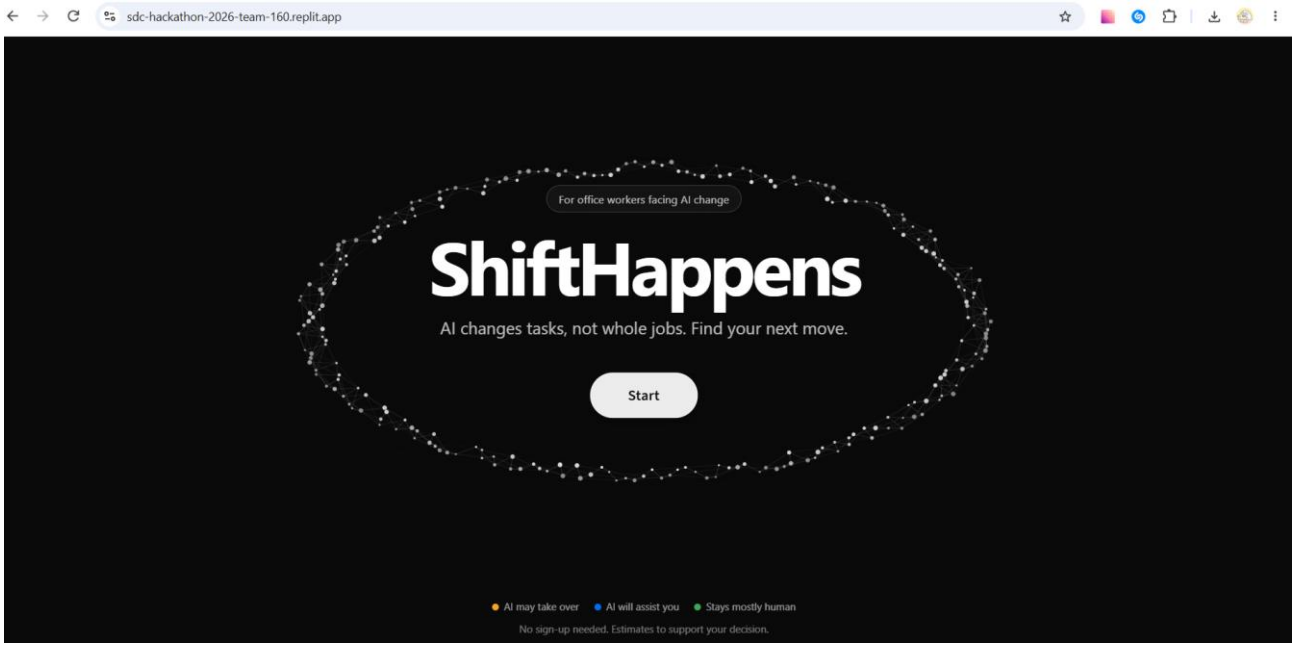

Date: 25 October 2026

1. How we use Replit

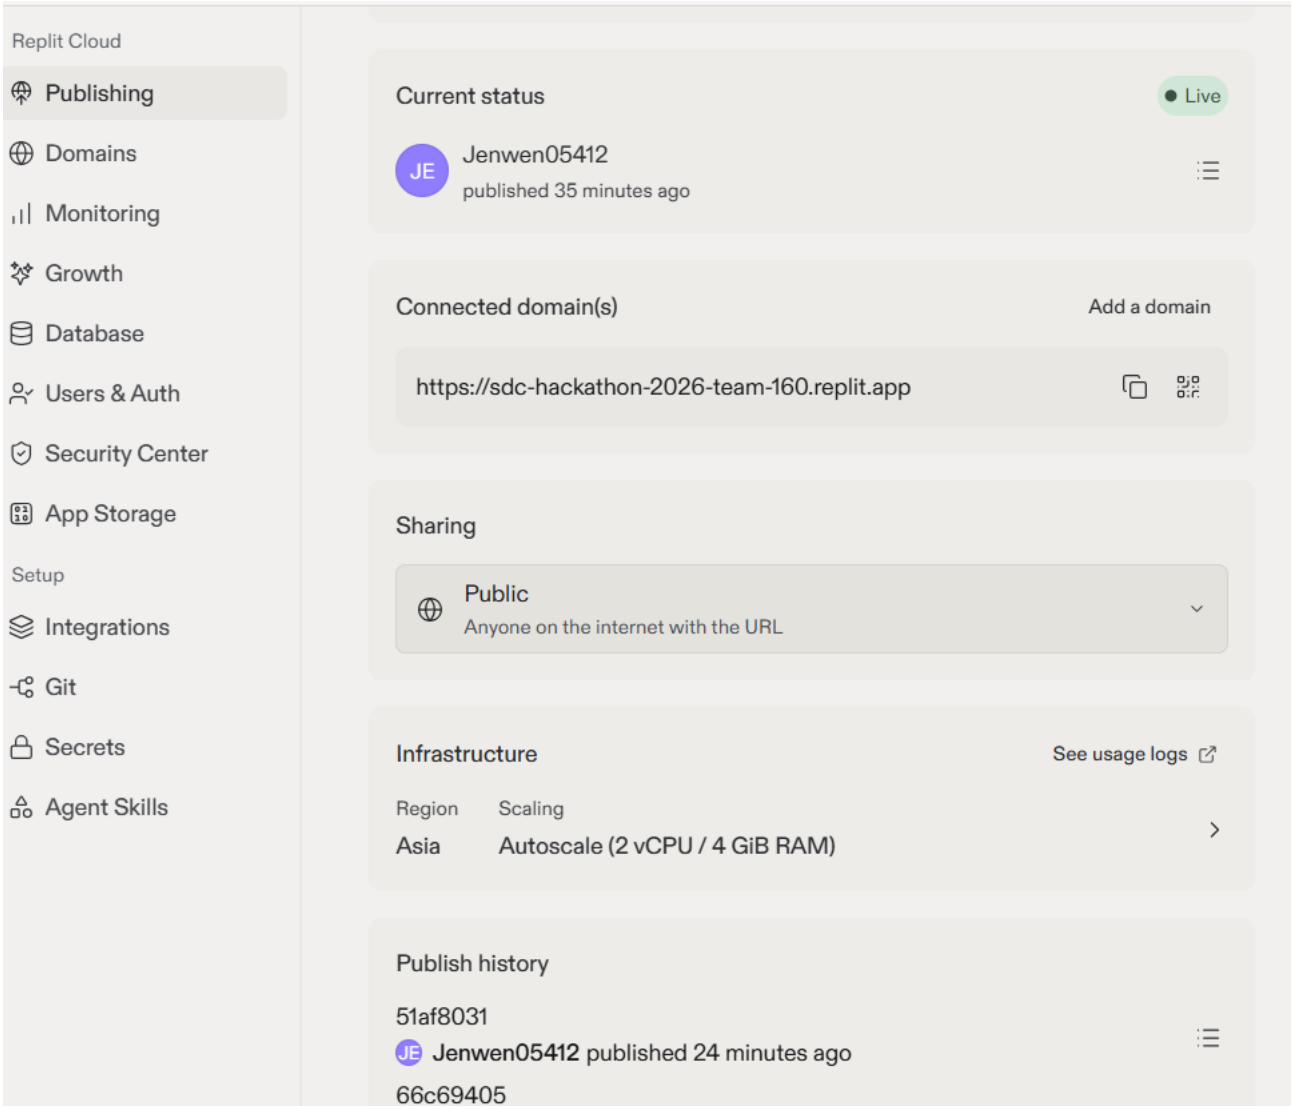

- Hosting: ShiftHappens is deployed with Replit Deployments (Autoscale). The live prototype that judges use runs at the URL above.
- Configuration: the .replit file in our repository defines the run command (streamlit run app.py) and the port used by the deployment.
- Secrets: the Google Gemini API key (LLM_API_KEY) and model name (LLM_MODEL) are stored in Replit Secrets, never in the code.
- Sponsor credits: the deployment is paid for with USD 25 of sponsor-provided Replit credits.

2. Evidence

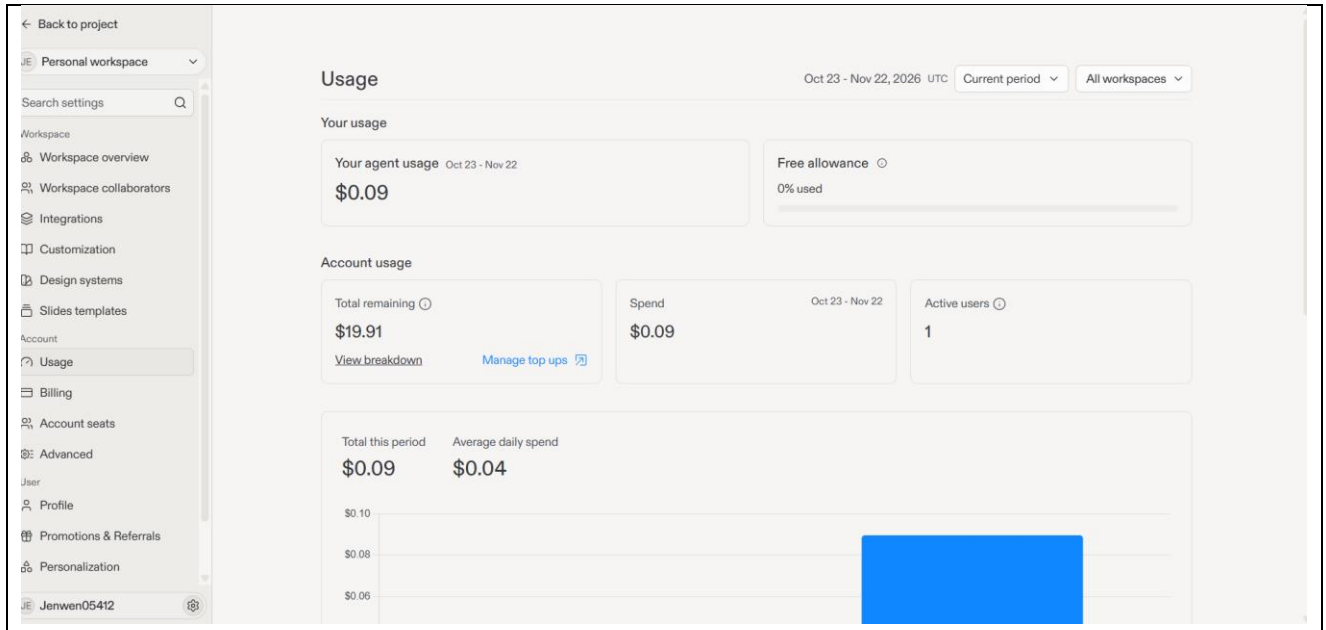

Screenshot 1 - The live app running on Replit

Screenshot 2 - The Replit deployment
